Processor: 1 Ghz Dual-Core CPU

Memory: 1 GB RAM

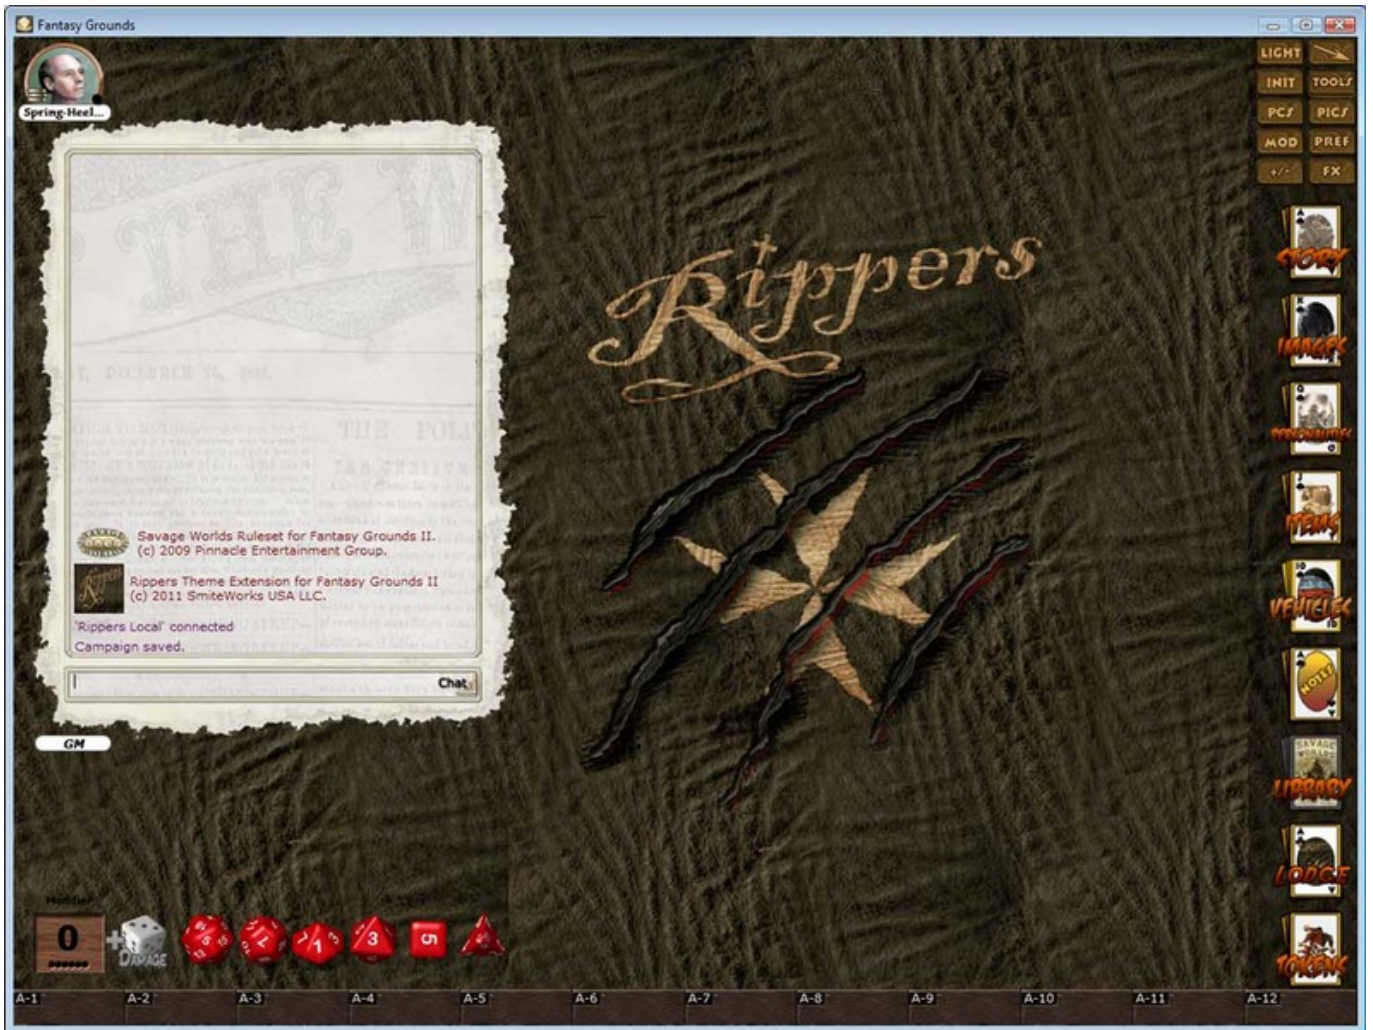

Hard Disk Space: 2GB

Video Card: Graphics Card with Shader Model 3 support, 256 MB video memory

DirectX®: 9.0c

Sound: DirectSound-compatible sound device

English,German,French,Italian

Shadow Blade somehow remind me of Super Meat Boy! Why? Do you familiar with this sense of screwing the level pace just for a second delay? Then pausing the game and restarting level is what you will do a lot in Shadow Blade. Of course you can play through all levels easily if you neglect 2 Hidden Marks and collectibles scatter in levels and prefer casual approach but you know, who wants to be a casual Ninja? So you run, jump, dash, throw shurikens and mixture of those to whether overcome platforming challenges which is the core of the gameplay or bringing enemies down. At the current state game has 4 chapters each consisting 15 levels and if they're not enough, there's also a Masterclass and Hardcore Edition of each levels which some of them are ready now and others under development. You can also jump in Dojo Editor and creates the levels you want to play or maybe challenge your friends but unfortunately there's no possibility right now to share created levels via Steam Workshop, a feature we will be assure that will add just doing ASAP guys! Shadow Blade is fast paced enough to hook you and will reward action fans well enough. Its control was not but now is solid and standard for the genre while best result achieved with Controller but you can play it with keyboard pretty well too.. <https://youtu.be/19fmaqNNrBE>. I really appreciated this title :

- Wonderful music
- Dev answers to any question in a blink of an eye
- No boring things like food or light management
- Only fun

8 / 10 well deserved. I don't think that the game is unenjoyable, but the gameplay in itself is really lacking. Not all that fun. This a primarily defensive team. The Goblin animations are fun and having a wide mix of characters Mino, Bull Centaurs, Dwarves and Goblins makes the team play a lot more like the undead. The CD are more about board control and movement than the Stomp and Run of other Non-Chaos Dwarf teams. I'm a Chaos player and its a nice change from the standard Chaos team the game comes with. Having the Dwarves with access to mutations on doubles is a big step up from the original re-iteration of the game when they didn't. Not a great team, but farm from terrible. A solid beginner team and those for lovers of chaos.. Is free. Good!

Is it worth for entertainment? No, in my opinion!

Its has very little action focus. It focuses on slow-motion scenes only!

There many actors that don't fit with the character on role, like Stryker and Kano: it did not convinced me.

A few words for an ok (just ok) series adaptation.

Everything in this game is so unbearably slow! You walk like a snail, the interaction panels can't be skipped, so you have to sit there for 30 seconds just for that damn animal to tell you it needs 3 berries or apples or whatever... What it needs is a minimap or some other guiding system, because i got lost so many times only to walk in circles 3 times and end up in the same place.

It has some nice pictures in the store page, but it's an utter disappointment, it's more frustrating than fun, especially when you walk through the whole map 10 times searching for a mushroom to give to some damn hedgehog.. This game never gets any better with regards to the bugs. Too much beard hair in the software. Try more programming and less time in the bathroom working on your silly beards. Why is this the only game on steam that is continuously release without actually being ready? I'm gonna ask for a refund.. Ever wanted to be a cute little tree stump? In "Woodle Tree Adventures" your time has come. You will try to rescue the land of trees which is suffering a big drought. It's very easy to notice because daddy trees tells you so and obviously any water is consumed by the big waterfall which you can see in the intro and in several levels.. :D ... Anyway.. Just try to find 3 fairy tears to fill the water buckets at the end of each level and land of trees will be saved. If you are lucky, it also has some elements of "Where is Waldo?" because of some weird camera glitches.

Nevertheless it is a very nice game to show the way of (tree) life. Plus, it's very appropriate for children by the use of its simple controls and the lack of being able to fail a level.. I bought this piece of crap program and it is the absolute worst program I have ever used in my 20+ years of using computers. Besides wasting over an hour of my life to draw a simple text image, it made an image that a 2 year old finger painting nightmare of a child would be ashamed of. You can't tell that it is supposed to say because it looks like dog vomit on a bad day. Not a single color was right, all 8 of them even though there were many more in the original image. Do not waste your time or money on this total BS program. It does NOT do anything like what it says.. I have never played Mahjong before, but this game got me into it. Decent tutorial too. Mediocre music, very nice backgrounds, great graphics, nice sound effects, and overall very enjoyable Mahjong game. On a downside, sometimes you are required to use special powers to complete a map (and you have limited "powers", which are saved from map to map, so you can actually lock yourself out if you overuse it), and there are boss fights, which are a different kind of game - rare, but still, I'm not running a mahjong game to play something else. Not sure if I'd recommend it for the full price, but on a sale it's a good game to get, especially if you want to learn Mahjong but are too lazy to read how to play the game.

I'll probably abandon it after a few hours of a gameplay, but it's still alright and I finally learnt how to play Mahjong.. Exciting worlds based on Lobachevskian geometry.
